

Pretest User Manual

V 1.0

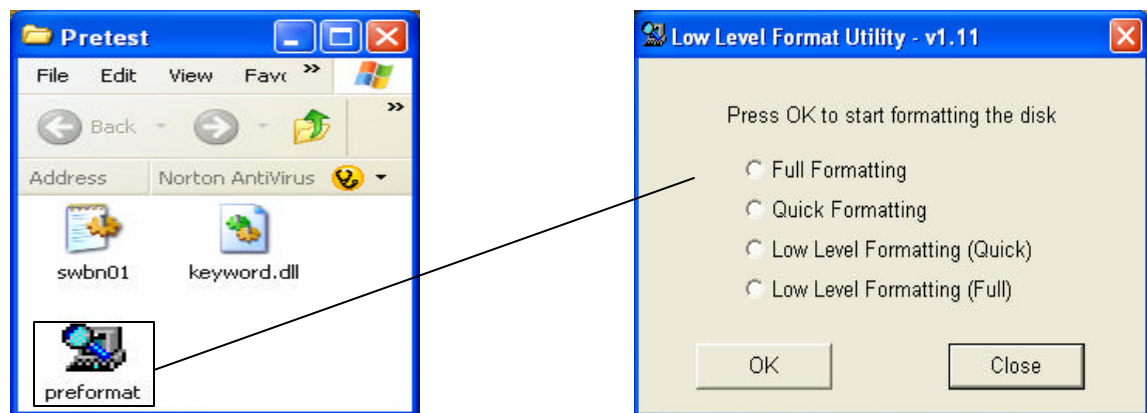

Step 1: Plug in the device to the USB port of a desktop / laptop Computer

Step 2: Make sure the name shown in “Device manager” => “Disk drives” is in “swbn.inf” file. If not, Please add it in

Step 3: Double click “Preformat.exe” file to begin.
(You will see the main screen as shown below)

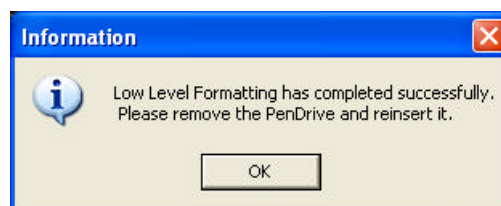

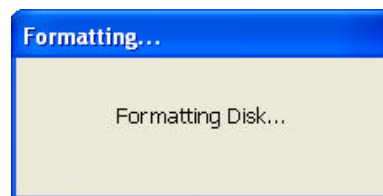

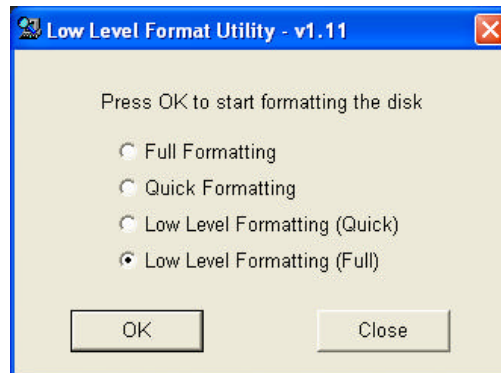

Step 4: Select you’re choice (type) of Formatting.

Full formatting	Normal Windows Formatting
Quick Formatting	Normal Windows quick format
Low level formatting (Quick)	Quick formatting device with firmware (try to restore default values)
Low Level Formatting (Full)	Full formatting device with firmware (try to restore default values)

NB: “full formatting” & “Quick formatting” uses the window's normal formatting Command , so the formatting screen shown will be a little different between Different window operating systems.

Low Level Formatting

PS: (1) When “Low Level Formatting” is selected, formatting will start automatically When press “OK”.

(2) LED light on the device will continue flashing during this process

(3) Wait till led stop Flashing and dimmed , as well as the formatting has Completed successfully message show up before removing the device From USB port.
